The Tatiya-Aggapaṇḍita is also known as Aggavaṃsa. And at that time, there were many dwellers of Arimaddana skilled in grammar, to the point that

their fame reached the island of Laṅkā. That is why grammarians of the island of Laṅkā, wishing to investigate the matter, travelled to Arimaddana city. Then the bhikkhus of Arimaddana showed them the Saddanīti. And in seeing it, the sīhaḷa bhikkhus examined it carefully, and they praised it, saying that there was no equal treatise on grammar in the island of Laṅkā, and they were not aware of all the discussions contained in that manual. This story is still circulating today.”

## Notes on the Pāli Tradition in Burma\*

by Oskar von Hinüber

The prominent position of Burmese scholars in the field of Pāli studies is well known for centuries. In the very recent past this has been documented by the monumental text editions prepared on the occasions of the 5th and 6th councils held in Burma in 1871 and 1956 respectively. Especially the Chaṭṭhasaṃgāyana edition (ChS) comprising the whole Tipiṭaka accompanied by its commentaries (*aṭṭhakathā*) and subcommentaries (*ṭikā*) together with the Visuddhimagga and the Visuddhimaggamahāṭikā in altogether 117 volumes reaches a very high standard sometimes superior to any other printed edition. In spite of these well known facts, the history of the Pāli tradition in Burma has hardly been investigated, although its influence on the Pāli texts as we read them today has been considerable.

These texts were handed down in those countries, where Theravāda Buddhism prevails. They are generally and correctly believed to rest almost entirely on the tradition as preserved in Ceylon and here again first of all in the Mahāvihāra.<sup>1</sup> Therefore it has been emphasized time and again that, whenever a relatively uncontaminated Sinhalese tradition can be found, a rather old and conservative form of that particular text survives. Unfortunately the number of such texts, which may be classified as being based on an authentic Sinhalese tradition is rather limited. Well known examples are the famous Copenhagen Jātaka-manuscript C<sup>k2</sup> or the Sinhalese manuscripts preserved in Copenhagen and London used by L. Feer for his edition of the Saṃyuttanikāya.<sup>3</sup>

\* Abbreviations follow the system laid down in the Epilegomena to the Critical Pāli Dictionary, if not stated otherwise.

<sup>1</sup> It is not clear, how the well known Vinaya fragment found in Nepal fits into this picture, as it may well be a remainder of "continental" Pāli.—Attention to this fragment was drawn by C. Bendall: Note on the history of the Pāli canon in Northern India. In: Verhandlungen des XIII. Internationalen Orientalisten-Kongresses. Hamburg 1902. Leiden 1904. 58–60, and it has been edited by P. V. Bapat: A Pāli manuscript in an Indian script. ABORI 33. 1952. 197–210.

Godakumbura: Catalogue of Ceylonese Manuscripts. Copenhagen 1980 (Catalogue of Oriental Manuscripts, Xylographs etc. in Danish Collections. Vol. I). p. 33.

<sup>3</sup> There is a manuscript dated AD 1412 in the Colombo Museum: W. A. de Silva: Catalogue of Palm Leaf Manuscripts in the Library of the Colombo Museum. Vol. I. Colombo 1938 (Memoirs of the Colombo Museum. Series A. No. 4) No. 70.

“The *Saddanīti*, however, does not only attest this occasionally rather far reaching spirit of innovation. For many archaic forms sometimes even lost in the rest of the manuscript tradition are preserved in grammatical literature”

## EXPLORING THE *SADDANĪTI*

### 1. Introduction

Grammars may be considered the absolute fringe of literature. Nevertheless, they go straight to the core of language — the medium in which literature is presented — and reveal a great deal about what those who wrote them thought about their own language, about language in general, and about their literature. Moreover, if a grammar becomes influential it will inevitably affect not only the composition of subsequent literature but also the way in which earlier literature is perceived, in much the same manner that David Lodge must have had in mind when he had one of the characters in his novel *Small World* write a thesis on the influence of T.S. Eliot on Shakespeare.

Devoted to the study of their canon, Theravāda Buddhists produced a number of grammars of the Pāli language. The *Kaccāyanavyākaraṇa* or *Kaccāyanappakarāṇa*, named after its author Kaccāyana about whom we know nothing, was composed in Ceylon some time after Buddhaghosa, who clearly does not know of it, and before its earliest known commentary, the *Mukhamattadīpanī*, written in probably the eleventh century.<sup>1</sup> It is obviously influenced by the Pāṇinian

\* First and foremost I wish to express my gratitude to Prof. K.R. Norman who asked me to lecture on the *Saddanīti* during the academic year 1989–90. My sincere thanks are also due to the other two faithful auditors of those lectures, Drs M. Cone and J.D. Smith. The three of them provided extremely valuable criticism, thoughtful suggestions, and indispensable encouragement. Furthermore, I would like to thank Prof. Norman for patiently and generously answering the many queries I have had in the course of writing this essay. Last but not least I gratefully thank Dr J.W. Benson who read through a previous draft and offered valuable comments. The no doubt numerous errors and inaccuracies which still remain are of course my own responsibility, as are the interpretations and views put forward.

## Some Probable Sanskrit Sources of the Pali Grammarians with special reference to Aggavaṃsa

Mahesh A. Deokar

It is a well known fact that Pali Grammarians have heavily drawn upon the Sanskrit grammatical literature in terms of technical terminology, technique and grammatical explanation. The three major Pali grammars viz. the Kaccāyana Vyākaraṇa (KV) (6th–7th century A.D.),<sup>1</sup> the Moggallāna Vyākaraṇa (MV) (1165 A.D.)<sup>2</sup> and the *Saddanīti* (Sadd) (latter half of the 12th century?)<sup>3</sup> along with the Kaccāyanavutti (KVu), the Moggallānavutti (MVu) and their subsequent sub-commentaries have made ample use of material scattered in the Sanskrit grammatical treatises.

O. H. Pind (1997: 39) identifies the Kātantra Vyākaraṇa, the Aṣṭādhyāyī and the Kaumārālāta as the probable Sanskrit sources of the KV. He (1997: 48) also points out to the probable connection between the KVu and the Kāśikāvṛtti. A probable Sanskrit source of the MVu is said to be the Cāndravṛtti (CVṛ). Cf. Scharfe (1977: 195). E. G. Kahrs, in his monograph on the *Kāraka* section of the Sadd (1992), tries to trace probable Sanskrit sources of the Sadd. According to him, apart from the non-Vedic rules of Pāṇini's Aṣṭādhyāyī, Patañjali, the author of the Vyākaraṇamahābhāṣya (MBh), is a likely source of the Sadd. For Kahrs, influence of Bhartṛhari's Vākyapadīya (VP) on the *Kāraka* section of the Sadd is beyond doubt. According to him, Aggavaṃsa (Agg) was either familiar with Kaiyaṭa's Pradīpa or some commentary similar to it. Kahrs also claims that Agg knew of and made use of Helārāja's commentary on the VP. The Kāśikāvṛtti and its sub-commentaries the *Nyāsa* and the *Padamañjarī* are mentioned as some additional sources of the Sadd. According to Kahrs, though Agg knew the Cāndravākaraṇa (CV) of Candragomin (Candra), he did not rely upon Buddhist Sanskrit Grammars in any significant way. Kahrs speaks in passing of the Kātantra (Kt) influence on the KV, but he does not identify any particular commentarial source from that tradition. Thus, scholars have hardly paid any attention to the Durgavṛtti (DV), the Durgatikā (DT) and the Kātantravṛttipañjikā (KVP) on Kt as probable Sanskrit sources of the Pali grammarians.

# Pali Textual Criticism in early 17th c.

Having bowed down to the Foremost (*pāmokkha*) of all the world [i.e. the Buddha], I will purify the *Pātimokkha* taught by him, [making it] flawless both in words and speech-sounds. In some manuscripts, discrepancy (lit. multiplicity) of speech-sounds is found, and in some places there are extra words as well. I will purify<sup>32</sup> the text without missing any of these cases, carefully observing the words and letters used by the great masters of the past in purified manuscripts, and comparing both [words and letters] with the rules of practice and the word-for-word commentary that are handed down in the *Vibhaṅga* and [also comparing them] with the commentaries.<sup>33</sup>

# Concluding Remarks

Most importantly: When we look for Pali scholarship in the early history of Myanmar, we do not find textbooks like those that we use today, we do not find translations, we do not find “original” manuals of Theravada Buddhism. We find a living Pali tradition that looks at Pali from the Pali, being the only language of culture, together with Sanskrit.
